.

hi jeanie,
here's the for the track system and the curtain.
the is 13 ml white vinyl with grommets every twelve inches, that the hooks attach to. These hooks a are on rollers that run through the length of track for each unit.
there will be two tracks to create three units in the corner of the space i outlined in my permit ap.
basically two of the industrial curtain hanger hardware png i've attached, but instead of threaded rod to the hangers, ours will be attache directly to the ibeams in that section of the building.
also the curtains will be twelve feet tall instead of eight as the space is twelve ft tall.
let me know if you need any more/other info

thanks

Eli
