Jeanie,

The silo was permitted under the 123 Washington Shell building permit, the base was installed as 2' of crushed stone and the 12" concrete slab on top.

Does this address all of the open items for the review?

Thanks,

Ryan

Hi Ryan,

Thanks for the ADA seating layout. As for the silo, it was not approved on the shell permit, even your plans say TBD by the tenant. The distillery was not approved on that permit due to the zoning text amendment, it is on this change of use permit. That being said, the details above along with the silo manual are acceptable information.

I can now approve the permit, the documents will be sent via email once prepared for issuance.

Best,
Jeanie
