May 31, 2017

RE: 5 - 7 Cumberland Avenue
Portland, Maine

To Whom It May Concern:

On March 30 - 31, 2017, New Meadows Abatement completed the removal of asbestos siding, approx. 1,800 sq. ft., from the exterior of the property located at 5 - 7 Cumberland Avenue, Portland, Maine.

The work area was isolated by the use of barrier tape and proper signage. A three stage decontamination unit was attached directly to the work area. The asbestos was removed carefully and kept wet at all times and placed immediately into properly labeled containers.

All asbestos work was accomplished according to all Federal and State rules and regulations using state-of-the-art equipment and techniques.

If there are any questions, please don't hesitate to call.

Sincerely,

Michael S. Lemar
Vice President
New Meadows Abatement Inc.
