Final Report of Structural Tests and Special Inspections

For compliance with the 2009 Edition of the International Building Code

Project:	Cumberland County Civic Center Renovation
Location:	Bounded by Spring St., Center St. & Free St., Portland, ME
Owner:	Cumberland County Civic Center Board of Trustees One Civic Center Square Phone: (207) 775-3481
Architect of Record:	Michael Johanning, AIA WBRC Architects Engineers 30 Danforth St., Portland, ME Phone: (207) 828-4511
Structural Engineer: of Record (SER):	John P. Poulin, P.E. WBRC Architects Engineers 44 Central Street, Bangor, ME Phone: (207) 947-4511

I, John P. Poulin, P.E., Maine Licensed Professional Engineer No. 11216 Expiration date Dec. 31, 2015, am the licensed design professional in responsible charge, and I have prepared or directly supervise the preparation of all design plans, computations and specifications concerning the primary Structural systems and members for the above named project. I, or my designee, have performed the necessary professional services and was present at the construction site on a regular and periodic basis. To the best of my knowledge, information, and belief the work proceeded in accordance with the requirements of the Code and the design documents approved as part of the building permit and that I or my designee:

1. Have reviewed, for conformance to this code and the design concept, shop drawings, samples and other submittals by the contractor in accordance with the requirements of the construction documents.
2. Have performed the duties for registered design professionals in IBC Chapter 17, as applicable.
3. Have been present at intervals appropriate to the stage of construction to become generally familiar with the progress and quality of the work and to determine if the work was performed in a manner consistent with the construction documents and this code.
4. The attached reports demonstrate that all discovered deficiencies have been satisfactorily corrected.

Nothing in this document relieves the Contractor or its subcontractors of their responsibilities and obligations for quality control of the work, for any design work which is included in their scope of services; and for full compliance with the requirements of the Construction Documents.

Comments: Architectural components of the building which are not primary load-carrying structural components (such as cold formed metal wall framing, metal stairs, metal rails) were independently designed and inspected by the Contractor's engineer responsible for the design of that component.

Respectfully Submitted,
WBRC Architects Engineers

John P. Poulin, P.E., M.L.S.E.
Principal, Structural Engineer
