To: Building Inspections <buildinginspections@portlandmaine.gov>

Just to be clear, I do not need Landmarks approval for an outdoor AC/heating compressor that would be in on the back wall of my residence? I understand that I do need to apply for a permit.

Your answer to my question is included in this email.

Thank you.

If you are not the owner of the property, then yes, you need written permission.

I am sure you're busy, but need to be certain. I am the owner of a condo at 727 Congress. I would like to add AC **to my unit and the compressor would be hung on the exterior wall outside of my apartment, in the back of the** building--you cannot see the back of the building from the street. I want to be certain I do not need Landmarks **approval.**

I really appreciate your help.

Thank you.

Sorry, I did not get a reply to my last question . . .

I am sure you're busy, but need to be certain. I am the owner of a condo at 727 Congress. This is not a **landmarks building; however, it is in a historic district. I would like to add AC to my unit and the compressor** would be hung on the exterior wall outside of my apartment, in the back of the building--you cannot see the back **of the building from the street. I want to be certain I do not need Landmarks approval.**
