Hi Ann:

Attached is the Planning Board report for the review of the site plan and TMP for the Baxter School. The review was for the school to occupy all three floors of the building. It notes that the fit out would be phased with the 9 and 10th grade first and then add the next 2 grades the following year. Thus, this project does not require any further site plan review. I believe you said you had the approval letter, but let me know if you need a copy.

Thanks.

Barbara
