Re: Exterior stairway, 105 Sherman St., Portland, ME.

Dear Mr. Taber,

At the request of Freeman Scott, I made a site visit to assess the subject stairway on February 6th. Subsequently, I met you at the site and gave you a list of recommendations to upgrade some of the framing connections. On February 27th, I met Freeman Scott at the site to review the work done on the connections.

The connection upgrades have been completed per my recommendations and the stairway appears adequately strong to support the design loads required by the building code.

If you have questions or require further services, please contact me.

Yours truly,

Daniel Chase
