Fire Department Requirements

Unitil previously submitted a Fire Safety Plan along with other information requested by the Portland Fire Department as part of its April 8, 2016 Amended Site Plan and Application for Conditional Use Permit (the "Site Plan"). Please see the enclosed excerpts from the Site Plan for information regarding Fire Department requirements.

As noted in the Project Description, neither the Regulator Building nor the DAC Building is intended for regular human occupancy. The building will not be connected to public water or sewer. The DAC Building will have an HVAC system for which a separate permit will be obtained.
