Scope of the work

Maine State security meet Capt, David Petruccelli on site at Waynefle Schools to discuss the fire alarm system, he has requested that we out separate fire alarm systems with master boxes in each building as those buildings now are being covered by a main fire alarm in the Founders Building which is scheduled for construction this summer, there will be 4 buildings being done Thomas House, Hurd Building, Middle School (Cook-Hyde and Morriell buildings) and the gym,

Capt Petruccelli said we only needed to apply for 1 permit and drawings and submittals were not needed as we are just placing a panel inside the building and keeping the existing zoning.

The New Panels will be addressable systems with the existing zones monitored by monitor mods. Each system will be tied to the City via a Master Box and have Central station Monitoring.

Thanks
