Dear Ashrap

I am currently reviewing your project for verification of compliance with the 2009 Edition of NFPA 101, Life Safety Code, and have the following remarks:

1. I need a better defined plan that shows travel distances, current fire protection features and current compliance with NFPA 101 such as emergency lights, separation and exit illumination.

If your plan requires any revisions, resubmit those revisions with the original pdf file names. If you need reference, refer to the name of your original attached files- please note that the file names need to be exactly as the original submitted files. Do not send them directly to me, as I am unable to upload them into the E-plan program. Once this is completed, our E-plan program will automatically assign a version to the revised plans.

Please let me know if you have any further questions, as well as when the plans are resubmitted if applicable. This will prompt me so I can continue to work on them.

Thank you,

Michael White

Dear Ashrah,

Thank you for providing the information I asked for.

I have reviewed and approved the NFPA 101, Life Safety Code portion of your project at #966 Congress Street. The permit may not be ready as of yet, as it may still need approval from other agencies.

I wish you the best of luck on this project.

Thank You,

Michael White
