Ice Pond Dam
Peaks Island

Financial Ability: The Peaks Island Land Preserve (PILP) will pay for the construction out of cash reserves.

Technical Ability: The PILP will be hiring a local contractor familiar with the process of the repair for the earthwork and a specialty contractor will be doing the repair. They have hired geotechnical and civil engineers skilled at design.

Traffic: This is a one time event. It will not generate significant traffic.

Dewatering: The contractor will place the material within an erosion control barrier for dewatering prior to covering it with 6” of topsoil.
