Scope of electrical to be done

1. Master Bath
   a) The master bath has one GFI outlet and we will be extending the line to accommodate another GFI outlet for the extended vanity.
   b) Move existing switch and wiring to the light in utility room to the space between shower and new closet area - install a new fixture, and switch on walls for a dressing table area.
   c) Connect the ceiling light in utility room to tie in with the existing ceiling light in master bath.
2. Extension of Master bedroom into porch area.
   a. Plug already exist on original exterior wall. Extend the line to include one more plug on that wall and one on both perpendicular walls.
3. The ceiling fixture is currently mounted on existing joists. Drop the fixture down to the new ceiling joist.
