Attachments: Stairs [4852].pdf

Hi,
I would like to apply for a building permit to build a set of exterior stairs to the second floor of a home on 78 read st. it has a existing deck that will remain. I will be removing the existing stairs that go to the deck, then installing the new stairs at a different location on the deck. The building plans are attached, the plans do not show the midway landing but there will be a 3'x3' landing midway up the stairs. Thank you
