Michael Brochu

Techno Metal Post's helical piles are manufactured right here in North American. They are screwed into the ground using proprietary machinery specifically designed by our engineers to provide you with an accurate measurement which is tested and validated right on site. We have developed a way to give you the exact bearing capacity you require for your structure. Our posts are designed, engineered and tested to the highest standards to ensure they withstand the toughest loads and conditions possible. Worried about frost-heaving? We have solved that problem with a heavy-duty polyethylene sleeve that has been specially designed to encase the post and prevent it from being affected by ground movement. With Techno Metal Post your projects and/or structures are completely supported in a cost-effective, easy to install manner.

Our posts are perfect for all kind of applications; Decks, Cottages, Boardwalks, Buildings, and many more.

- » READY TO BUILD
- » REMOVABLE
- » AUCUNE EXCAVATION
- » MINIMAL ENVIRONMENTAL IMPACT
- » NO CONCRETE REQUIRED
