Hello Jeanie,

Please find attached the updated site plan for the Forefront Brick South outdoor dining permit application. Please note the following amendments.

- Two voice annunciators tied into the buildings current system. DeBlois Electrical to do the work as they installed the current system.
- Notes in reference to grading transitions showing ADA compliance.
- Notes confirming that at least 5% of dining surfaces will be ADA compliant.
- All shipping containers have been removed and replaced with fencing still maintaining all areas of egress.
- Please note the seating arraignments are an example as each event will vary in the seating layout. However, we will maintain all items pertaining to the permit.

Please feel free to contact me at your convenience. Thank you.
