Hi,

Our entire lot is approximately .7 of an acre. Most of this area is enclosed by a 6 ft. stockade fence. I do not know the exact
footprint of the house. The shed in the back left corner was here when we bought the house. The small existing shed is 6 ft. x 10 ft. and approx. 7 ft. tall. I am quite certain I gave you the dimensions and a picture of the greenhouse. It is 10 ft. x 12 ft. The green house will sit at least 8 ft. from the property line on the west side and 20 ft. on the northern line (back of lot).
I will look in our home buyers file for the house dimensions, though I am not sure why you need the exact house dimensions. Yes we have a garage attached to the house. The front of the house has a lawn and landscaping with a yew hedge facing the road. We keep it tidy. It is a small house, one story brick.

We had a visit from Chuck Fagone and he said he saw no problems with our plan or the property. We do have plans to replace the fence and have purchased cedar fencing for that project. The current fencing was in poor shape when we bought the house. I also have problems with neighbors piling debris and junk against it on the outer side though I am hoping to convince them to stop doing this.

I will send another layout with the house/garage on it and dimensions.

Thank you.

Mihku Anderson
