Subject: Re: Life Safety Code Assessment

Doug,

This will be acceptable.
The permit will be released and the work by Protection Professionals can begin.

Hi Ben,

Sorry for the delay here. We were trying to get an idea of what such an audit would cost and it looks like it's something we can do with existing resources, without a formal FRP process. We are committed to having the audit completed as soon as possible. Will that "commitment" be enough to release the permit? Protection Professionals are ready to do the work and we need it completed by June 30th in order to utilize the FY 13 allocation. Thanks and please let me know as soon as possible.

~Doug.

Hi Doug,
Issuance of the fire alarm permit was contingent on the life safety code analysis. This would be a condition of approval for the permit to be issued. Without it the permit cannot be issued.
Please advise.
Ben

Hi Ben,

Just to be clear, as I'm sure you are aware, I can't guarantee that the funding for this Life Safety Code Assessment will ultimately make it through the City's budget process, but we will include it in our submission. Thanks.

~Doug.

Ben,
This is a note to follow up our earlier conversation regarding a Life Safety Code Assessment. To confirm, I spoke to Doug Gardner, Director of Health and Human Services and we agree that we can put the cost of the assessment in Barron Center's 2015 budget.
We are hopeful this meets your requirement and satisfaction.
If you need anything further, please let me know.

As always, thanks for your help.
Karen
