Subject: RE: Permit application

We have added cooling units with hot water coils to the building along with ducting is all new. The existing boiler will provide hot water to these units for heat. The hood permit is labelled separately. Do I need to break it out by cost? 85K for hvac, 10k for hood. Or just fill out the same application twice and send separately?
Sorry for the confusion,
Brent

Dot
First off, please do not send to both Lannie and Building Inspections; they're one in the same. Second, could you please clarify the permit application(s) you have provided? The HVAC states existing boiler? What are you getting an HVAC permit for? Also, the Kitchen hood documents should have it's own permit application, since it's a separate item.
