STATEMENT:

This is to State to SUPERVALU, INC., and First Suburban Title Insurance Company that I have surveyed the property described above according to the requirements for land surveyors in the State of Maine; that this survey was made on the ground according to the field notes shown on this survey; and that this survey is a true representation of the Property and correctly shows the size, location and the exterior boundaries of the Property. The survey also correctly shows by document number all recorded easements described in the commitment for title insurance issued by First Suburban Title Insurance Company No. SUPERVALU (03-898), with effective date of July 24, 2003. Adequate ingress to and egress from the Property is provided by Milliken Street, which are paved and dedicated public rights-of way maintained by City of Portland. Except as shown on the survey the Property does not serve any adjoining property for drainage, ingress and egress or any other purpose. Except as shown on the survey, there are no visible easements or rights-of-way on the Property, and there are no observable, above-ground encroachments (i) on adjoining properties, public road rights-of-way, or easements located on the property by the improvements on the Property or (ii) on the Property by the improvements on adjoining properties or public road rights-of-way. Except as shown on the survey, no portion of the Property lies within a Special Hazard Area, identified as such under the Flood Disaster Protection Act of 1973 or as described on the Flood Insurance Rate Map for the community in which the property is located. I further state that Parcels as shown hereon adjoin each other along their common boundaries without gaps or overlaps. I further state that a map or plat and the survey on which it is based were made (i) in accordance with the "Minimum Standard Detail Requirements for ALTA/ACSM Land Title Surveys" jointly established and adopted by the ALTA/ACSM and NSPS in 1999 subject to the following exceptions: no surface investigation performed and includes Items 2, 3, 4, 6, 7a, 8, 9, 10, 11a, 13, 14, 15, and 16 of Table A thereof, and (ii) pursuant to the Accuracy Standards (as adopted by ALTA, NSPS, and ACSM and in effect on this date of Standard Detail Requirements and procedures, instrumentation and adequate survey personnel were employed in order to achieve results comparable to those outlined in the "Minimum Angle and Distance Requirements for Survey Measurements Which Control Land Boundaries".
