Hi Chris,

Yes, the new stairs are configured to be tucked against the porch. The stoop to be approx 4x6, the staircase itself works out to between 8.5 and 9 feet in length by approx 4 feet in width.

thanks,

tom

> I am in the process of reviewing your permit application to replace the rear staircase and stoop at 460 St John St. I had a question - is the new stairs/stoop a different configuration than the old one? In aerial photos it looked like the old one came straight out and the new one will be tucked against the porch.
>
> Also, can you tell me roughly what the dimensions of the new staircase will be? Scaled from the plan it appears to be about 4' by 8' but I just wanted to confirm.
