Chris,

There is no vegetation other than grass at this time. We will be planting some decorative plants next year, but for now no plantings or landscaping will be impacted by the tank installation. Because it will be underground it will not interfere with our options for locating the plantings.

Thanks

-Jamie

Subject: Permit #2776 - 5 City Point Rd, Peaks Island

Hi Jamie,

I am in the process of reviewing the above-referenced permit application to install an underground propane tank at the sewage pumping station. It is my understanding that the last planning review of this project required certain buffer landscaping as a condition of approval, so I am wondering if this new activity will impact the landscaping/vegetation at all?

Thanks,
Chris
