Hi Ann

Just measured the porch. Looks like the 2nd and 3 rd floor porch are 7x16. The enclosed part is only about 6 to 7 feet which I think is different than you have on file. The first floor enclosed porch is 7x10. Give me a call and I can explain more.

Thanks

Matt Goodrich

I need you to draw a sketch of the rear of the building that shows what the dimensions are for the enclosed area on the rear of the building and the length of the deck for the first and second floors. The dimensions submitted on sheet 1 are not accurate.
