Hi Matt,

I was able to talk this over with my supervisor today. She said she would be OK with the creation of the peaked roof under the following conditions:

1) That the garage is proven to be at least 5 feet from the side property line (this may require that you enlist the services of a surveyor, as we discussed on the phone).
2) That the pitch of the roof does not exceed 3:12 (the plan you submitted is a little fuzzy so I can't tell exactly what the pitch says).

Let me know if you have questions about this information.
