Cc: cstacey@portlandmaine.gov

The plan is to install a precast unit adjacent to the house that has a landing and two steps measuring between 5'-6" and 6' to be in compliance with City standards. As you can see on the plans, the walkway gets wider after those two steps because it transitions to a paver walkway with embedded landscape steps to transition the grade along the retaining wall to the driveway grade.

Below is an image of what we had in mind. Please let us know if you need further detail or if you have any additional questions.
