Re: Decking projects

We are pleased to provide you with a proposal to replace your two decks at your home. The breakdown is as follows:

Side entry:

We will remove and dispose of your existing deck, construct a new 48" x 50" deck with a pressure treated frame, 3 steps and Trex decking. We have based the decking on standard gray or tan color, other colors are available but may be at an added cost. We will use hidden fasteners on the deck boards with the exception of the outside frame and the stairs which will be stainless steel screws. The railing will be white vinyl by Fiberon.

Back deck:

We will remove and dispose of your existing deck, construct a new 12' x 10'deck with a pressure treated frame, 2 steps and Trex decking. We have based the decking on standard gray or tan color, other colors are available but may be at an added cost. We will use hidden fasteners on the deck boards with the exception of the outside frame and the stairs which will be stainless steel screws. The railing will be white vinyl by Fiberon.

The cost for the above services is [redacted]

We have included all of the necessary permit submissions and permit costs for the two decks.

Respectfully Submitted,

Greg Marles
Principal

Acceptance: Jay McNaughton Date: 6/5/16

Terms: ½ down upon acceptance, [redacted] due upon delivery of materials and balance due upon completion
