Re: Structural support for new roof top HVAC unit

Reviewed for Code Compliance  
Permitting and Inspections Department  
Approved with Conditions

**04/23/2018**

Dear Shawn,

Thanks for meeting us last week at your facility on Marginal Way in Portland, Maine to review the structural support necessary for installing the proposed nominal ten-ton (capacity) gas/electric HVAC rooftop unit.

During the visit I reviewed both the specific requirements of the unit and the existing structural support in the immediate and area surrounding the proposed roof location. The existing support in this area is in very good condition and the capacity of the existing support is more than adequate to safely support the unit in this location.

Feel free to contact either myself or project engineer, Andy if you have any further questions and/or concerns.

Thank you,

Dan Thayer, P.E.  
President and CEO
