

Client: S.W. Cole Engineering, Inc.**Project:** Goodfire Brewing Co.**SWCE Project #:** 17-0109.1**Date:** July 26, 2017**Subject:** Structural Steel Site Inspection**Report:** 001

As requested a site visit was made on this date for an initial structural steel inspection of the Goodfire Brewing Co. project located at 219 Anderson St. in Portland, ME. Upon arrival we met with the project superintendent for Landmark Construction Inc. as well as the erector. Our actions and observations were as follows:

- We reviewed all drawings provided in submittal number 05.500.01.00 which include the Associated Design Partners Inc. (project# 16370) drawings S1 and S2 as well as LMC Light Iron Inc. shop drawing number one reviewed and marked up by the EOR on June 02, 2017.
- Welder certifications were provided for all welding personnel on the project. All personnel were properly certified in the welding processes and positions to be used on the project.
- A discussion was had between ourselves, the GC and the erector concerning inspections required and frequency of the inspections. It was determined that one inspection would be performed in each of the two areas requiring reinforcing, provided no structural steel will be covered prior to completion of each area.
- There was no work completed and ready for inspection at this time.
