

Atlantic Comfort Systems, Inc.

170 Anderson Street, Portland, Maine.

We are adding a Carrier roof top unit and two Reznor unit heaters, all are gas fired.

The rooftop unit sits on a factory curb and the Reznor unit heaters are hung from the structure with 3/8" threaded rod.

The roof top unit is a direct vent piece of equipment straight from the factory. The two Reznor unit heaters are vented through the roof with "B" vent metal pipe.
