Yes. They are fine with the other documentation he submitted.

I hope these will work for this project.

Please let me know if you need more info.

Thanks

-Eric

You still need to provide a complete application package. Pictures and an application does not complete the application package. Plans are required. Please see highlighted documents required.

Once we get a complete package, we can enter it.

Eric

Your permit still needs to go through review process. Even with the fast track, the permit can take on average, 15 business days; once paid. Please see attached for process.

Hello, I spoke with Tammy on the phone today about completing a fast track building permit. I am replacing a failed frost wall with 4 new footers and frost piers. The frost wall supports the beam which carries the homes covered and enclosed porches. We will remove deck boards and the front stair in order to gain access to the foundation of the decks. Once the foundation work is complete, we will replace the deck boards and stair and fix any trim. We will also be re-jacking the porches to their proper height.

I am attaching the fast track application along with annotated pictures of the site. Please let me know if you have trouble finding my comments on each picture.

Thank you very much. I am hoping to begin work this Monday, March 21st.
