Hi Laurie,

Construction is well under way at the 131 Washington Ave project. The owner has been showing the renovated building to prospective tenants and there has been a nearly universal request to reconfigure the stair from the Second Floor down to the Common Room in order to maximize extremely limited usable space within the ell.

Attached is a revised drawing showing this change. Please let me know if you have any concerns or comments and if any additional information is needed.

Thank you.

JOHN TURK
