Thanks, Jed.

Jeanie, please follow-up with Jed about any further specifics you need regarding the installers.

Thanks,

Mike

Mike,

We will be using Keeley crane to set the containers, Hy Tech Plumbing to hook up plumbing on site and either Northeast Electric or BH Miliken to perform the onsite electrical work. Electrical and plumbing will pull permits for their onsite work. Les Wilson and sons will be doing the site work, sewer, and foundations.

Thanks,

Jed

Jed,

He means who will you be using to set in place, bolt together, and hook them up to utilities I believe. We had touched on this last year and you said you had someone in mind for those responsibilities.

Mike,

We are using the same TPIs for our project. What do you mean by installer?
