

A13 001

MISC Details

This building is to be built off sight. We are hoping to use the building To cook burgers and fries to take some of the stress of the kitchen. This burger shack will only be used at peak times during the week and will only be used in the summer months. If you look at layout A-4 001 you will see the floor plan in the plan there is a 6x 3 ft. hood the hood will have a full fire suppression system all stainless behind friars.

The building is to be 7ft by 11 ft. it is to be place on the property where there is currently a small shed which is indicated in C8-001 the current shed is to be moved off sight.
