Re: Curran Property on 203 Congress Street

In 2010 his building caught fire on the rear right corner 2<sup>nd</sup> floor and up into the 3<sup>rd</sup> floor due to a fire in the building next door. When we arrived days later our first task was to disconnect any old wiring that was effected in anyway by the fire and we completed that task. Soon after pulling correct permit we started removing what was left of the old wiring affected by the fire in its entirety. The third floor apartment was completely rewired with the exception of the front common hallway. We also rewired the back half of the 2<sup>nd</sup> floor apartment completely. Not only was all of the wiring affected by the fire removed and rewired but additional work above and beyond was also completed in order to help bring building up to code.

Sincerely,
