Re: 42 Lafayette Street, Portland, Maine

Dear Mr. Bahlkow:

Abatement Professionals Corporation (APC) is providing you with the asbestos bulk testing results for the samples collected at 42 Lafayette Street, Portland, Maine from the complete building survey which was conducted by Kris Rickett.

APC collected 30 samples of suspect building materials. The materials sampled ranged from floorings, to wall materials to ceiling materials.

The MDEP Chapter 425 and USEPA has minimum sampling requirements for asbestos building material investigations, the requirements are as follows;

The bulk samples were collected with standard sampling protocols, properly packaged, maintained and shipped to EMSL Labs, South Portland, Maine for analysis Report of Bulk Material via EPA Method 600/R-93/116 Polarized Light Microscopy.

The bulk samples analysis indicates that the structure has NO regulated asbestos containing building materials in the following forms;

Asbestos Materials	Location	% Asbestos	Regulated
B-2A Floor Tile	1 st floor kitchen- 2 nd layer down	1.2 % asbestos	Yes
B-5A linoleum	1 st floor bathroom	31.1 % asbestos	Yes

(See attached bulk sampling summary for more detailed information)

The bulk sample analysis indicates that there are detectable levels of asbestos were found in the building materials tested. Should any additional suspect building materials be found during any

of the demolition/renovation work, the work should immediately stop until additional sampling can be conducted.

We appreciate the opportunity to service your asbestos testing needs, should you require Further bulk or air quality sampling please feel free to contact us at any time.

Very truly,

Kris Rickett
Vice President
