

Litchfield Electric

February 23, 2016

14 Tucker Rd.

Buckfield, ME. 04220

To: Louis Chiasson and Captain David Petrucci

I did an initial inspection of the 6 unit building located at 127 Congress St. before Louis purchased the building in October 2014. I informed him the need for a service entrance cable replacement for the 200 amp service. That cable has been replaced. Also a complete check of the smoke detectors and work in the basement taking care of open wires and junction boxes and light fixtures has been performed. After further inspection of the whole building the electrical system will need future upgrades but for now it is in good safe condition. Feel free to call with any questions.

Respectfully submitted,

Allan Litchfield Jr.
