FEATURES:

• UL Listed

• Designed for use with all NS analog sensors

• Available in 4 and 6 inch models

• Contains a security locking tab for tamper protection

DESCRIPTION:

The Napco **FWC-FSLC-SMK6B** bases are designed specifically for use with the Napco Analog models FWC-FSLC-SMK and FWC-FSLC-HEAT.

The FWC-FSLC-SMK6B common mounting base allows for complete compatibility for all of the Napco Addressable Series Analog sensors. The bases are lightweight and very thin, providing a low profile once installed. The solder-less screw terminals enable quick and easy wiring connections.

APPLICATION:

The Napco FWC-FSLC-SMK6B mounting base is electronics free and features a simple rugged design with screw terminals for wiring connections. A common mounting base allows for easy sensor interchanges while maintaining loop continuity when sensors are removed. A simple anti-tamper head locking system is provided that is enabled by removing a small plastic tab on the back of the sensor. Once locked, the head can only be removed using a small diameter screwdriver.

ENGINEERING SPECIFICATION:

The base shall permit direct interchange with the NAPCO FSLC-SMK Photoelectric Smoke Sensor, and FSLC-HEAT Heat Sensor.

The vandal-resistant, security locking feature shall be used in those areas as indicated on the drawing. The locking feature shall be optional and can be implemented when required.
