RE: 30 Merrill Street  
Portland, Maine 04101

Dear Mr. Gorlob;

On November 4, 2016, New Meadows Abatement completed the removal and disposal of some asbestos debris in an approx. 50 sq. foot area where boiler had been previously removed by someone else. Some debris that had been left on the pipes was also removed and disposed of.

The work area was completely contained and isolated by the use of six-mil polyethylene. The containment was maintained under negative pressure throughout the project. The asbestos was removed carefully and kept wet at all times and placed immediately into properly labeled containers.

Air sampling conducted at the conclusion of the job indicated an airborne fiber level below the EPA's recommended clearance level of 0.01 fibers per cubic centimeter of air. A report will be sent upon receipt from the independent hygienist.

All asbestos work was accomplished according to all Federal and State rules and regulations using state-of-the-art equipment and techniques.

If there are any questions, please don't hesitate to call.

Sincerely,  
Mike Lemar  
Vice President, New Meadows Abatement, Inc.
