Brian,

Thank you again for your quick responses and handling of this project.

- Yes, the NFPA 13R Sprinkler is throughout. Existing and Addition
- The finishes in existing will be replaced on an "as needed basis", but we did call it out as a Level 3 Alteration in the IEBC and that finishes should follow IBC Table 803.9

Exit enclosure - Class C materials
Corridors Class - C materials
Rooms Class - C materials

I hope this helps. Let us know if you need any more information

-Eric
