The P84-LED IC rated, new construction recessed can is designed specifically for use with P8061 Series LED trims (purchased separately). The integral quick link connector provides electrical connection to the trim in place of a traditional Edison base socket. The P84-LED in conjunction with the P8061 series LED trims is a high efficacy luminaire compliant with California Title 24 requirements for recessed lighting. Marked for 15W maximum input power, the P84-LED is also a great option where lighting power densities limit allowable W/ft2.
