

72 Munjoy 3 unit project description

We are proposing to build a new 3 unit condominium building attached to our existing 2 unit building that we recently completed a renovation on. The new building will have a common wall with the older existing structure and will consist of first floor parking and 3 units above one on each floor. We are trying to stay consistent with the style and flavor of the neighborhood with a more upscale design and façade. Each unit will be a two bedroom 2 bath configuration with modern amenities and energy efficient systems. I have enclosed a brochure of the existing building for a reference.
