Warren McDonald, Inspector of Buildings

Dangerous building et 36-38 Munjoy St. Onne Mr. Graff Walch.

Having had long drawn out proceedings about this building since May 11, 1956, when a permit was issued to demolish the rear ell and to provide concrete block piers for foundation of the main building in place of the original cedar posts, on October 23 an order was sent by Registered Mail, Return Receipt, for him to correct the dangerous conditions before November 2. The belief was expressed that the only remedy was to demolish the building entirely in view of the fact we had done everything we could since August 15 to help him energe with a safe building, without cooperation on his part.

On October 31 Kr. Walsh called up to explain that he had been busy and unable to arrange for correction of the work, and that he wanted to close—in the spaces beneath the building temporarily for the winter. He was told that this would not be satisfactory, whereupon he promised to have a plan, showing how he would complete the work in compliance with the Building Code, filed in the office by November 7. None has been filed.

Next we heard from Mark Barrett, Esq., his attorney, who was to come in and talk to me on November 5. He later phoned that he could not come in on the 5th, but would be in later. He has not been in.

This building is in very bad condition (attached 3 photographs). Mr. Walsh has been trying to do the work with his own hands; and although he is a mason, has shown no ability to plan the work or carry it out. We have done all we can on the matter, and it is my recommendation that we proceed without delay before the storms of winter prompt sympathy for the owner. No one is living in the building.
