

33 Atlantic St- AMENDED PERMIT # 2016-00204

This application is for authorization to move our garage structure 18" to avoid encroachment of neighbor's property at 34 Munjoy St. I have attached a survey detailing the encroachment, and propose to move the structure and front and rear foundations 18" forward towards Atlantic St.

We understand that we require the consultation services of a structural engineer and are meeting with our engineer next week (6/23) to discuss. We will provide engineer drawings as soon as they are available.

There will be no structural alteration to the exterior of the building and all interior elements will remain the same, as detailed on original permit application.
