Jean ,

I just took this photo of the tree in question ,and clearly this tree is not an issue .It is established and has been like this for a number of years . If the city continues to take down trees to suit developers needs , I fear we will no longer be "the forest city " It appears as though it does interfere with the driveway plans . Also as the new R6 zoning barley leaves any open space on the lot for landscaping ,perhaps a tree or trees along Fore St at the front of the building would assist in meeting requirements

Thank you

Mary Casale
