Mary

I just wanted to update you re the discussion at the PB workshop on this.

A couple of the PB members asked for more photos and info as to why this tree should be removed. The applicant will need to include this in the final submissions.

However, the City Arborist supports its removal and considers the two replacement trees acceptable.

Thank you
Jean

Jean ,

I just took this photo of the tree in question ,and clearly this tree is not an issue .It is established and has been like this for a number of years . If the city continues to take down trees to suit developers needs , I fear we will no longer be "the forest city " It appears as though it does interfere with the driveway plans . Also as the new R6 zoning barley leaves any open space on the lot for landscaping ,perhaps a tree or trees along Fore St at the front of the building would assist in meeting requirements

Thank you
