Mr. Wallace,

I am working on some of the issues at 190 Congress this weekend.

I have contacted my plumber to install the fire protection over the furnace and will let you know when that is done.

Will pick up the combo unit hard wired smoke/CO units over the weekend and begin installing them (I may not finish this weekend though).

Great Stuff will be done asap.

Combustibles have been removed from the front stair case.

Temporary drop lights will be stored and only used as necessary.

I'll keep you posted on progress.

Thank you,

Jay R. Piercy
