Re: WEX Foundation Piles
Attn: Bill Peterlein

Dear Bill,

We are writing to confirm that we considered corrosion loss when evaluating HP10x42 piles sections for the WEX project. Corrosion loss was considered at a rate of 0.001" per year.

We are also writing to confirm that two high-strain dynamic loads tests were performed on selected test piles.

Please forward this information for review by the project architects and other reviewing parties. Please contact us if you need any additional information.

Thank You,

David Gifford
