Automatic Fire Sprinkler Compliance Letter

Dear Mr. Larsen,

This letter serves as Dean & Allyn's statement of compliance regarding the design and installation of the automatic fire sprinkler system for the referenced project. All work provided was done in accordance with the requirements of NFPA 13 and local & state codes.

The subject work primarily involved design and installation of a wet automatic fire sprinkler system for a new office building per NFPA 13. The system includes a combination class 1 wet manual standpipe system designed and installed per NFPA 14.

The design of the installed system has been accepted and approved by all local authorities having jurisdiction.

All control valves supplying the system are open and the system has been left in service at the time of this statement.

Sincerely,

Dean & Allyn, Inc.

Derek Narvaez
