
5. FINANCIAL & TECHNICAL CAPACITY

5.1 FINANCIAL CAPACITY

As previously noted, the proposed Thames Street Extension project will be paid for by the City of Portland. A cost estimate has been completed for the project. The estimated cost of permitting, design, construction, and construction administration is approximately \$1,200,000. The project is included in the City of Portland's approved 2018 Capital Improvement Plan.

5.2 TECHNICAL CAPACITY

On behalf of the City of Portland, Woodard & Curran is preparing this application for the Thames Street Extension Project. Woodard & Curran has extensive experience with design for site construction and roadway projects and resumes can be made available upon request. Woodard & Curran is an over 1,000-person Portland-based firm that has provided engineering services to the public sector for more than 35 years, including permitting, civil/site engineering, storm water, and construction management services.
