PERMIT ISSUED	
MAR 26 2007	
CITY OF PORTLAND	

This is to certify that COMMITTEE TO RESTORE THE ABYSSINIAN CHURCH here

has permission to Interior Demolition to map existing structure

AT 73 NEWBURY ST City of Portland 020 B005001

provided that the person or persons who accept this permit shall comply with all of the provisions of the Statutes of the State and of the Ordinances of the City of Portland regulating the construction, maintenance and use of buildings and structures, and of the application on file in this department.

Apply to Public Works for street line and grade if nature of work requires such information.

Notification of inspection must be given and when permission is procured before this building or part thereof is leased or closed-in. 4 HOUR NOTICE IS REQUIRED.

A certificate of occupancy must be procured by owner before this building or part thereof is occupied.

Building Demolition Notification Form (BDNF)

Important Notice: Maine law requires the filing of this "Building Demolition Notification Form" prior to demolition of any building except a single-family home

- 1) Building owners are required to provide this notification of the demolition of a building to the DEP at least 5 working days prior to the demolition. This notification is not required before the demolition of a single-family residence or related structure (e.g., garage, shed, barn). It is also not required if previous notification of the demolition has been provided to the DEP as part of an asbestos abatement project notification. *Demolition* means the tearing down or intentional burning of a building or part of a building.
- 2) Prior to demolition, building owners must determine if there is any asbestos-containing material(s) (ACM) in the building. An "asbestos inspection" by a DEP-licensed Asbestos Consultant is required for all buildings except single-family homes and residential buildings with 2-4 units built after 1980. In lieu of an asbestos inspection, pre-1981 residential buildings with 2-4 units can be surveyed to identify possible ACM by someone knowledgeable about ACM, such as a code enforcement officer or building inspector. If materials that may contain asbestos are found, then you can either assume they are ACM or hire a DEP-licensed Asbestos Consultant to test the materials.
- 3) Whenever more than 3 square feet or 3 linear feet of ACM is identified, the ACM must be abated in accordance with the *Maine Asbestos Management Regulations* by a DEP-licensed Asbestos Abatement Contractor. This includes materials presumed to be ACM. Check www.state.me.us/dep/rwm/asbestos/index.htm for a listing of asbestos contractors.

Prior to issuing a local demolition permit, the DEP requests that municipalities have applicants for municipal demolition permits complete this form and fax it to the DEP at 207-287-7826. Municipalities should not issue local demolition permits if the required asbestos inspection or survey has not been performed and identified ACM removed.

Were asbestos-containing materials found? yes no no inspection or survey required (post-1980 2-4 unit)

Re: Asbestos Bulk Sampling Results, Abyssinian Meeting House, Portland Maine.

Dear Mr. Griffeth:

Environmental Safety & Hygiene Associates Inc. (ESHA) is providing you with the asbestos bulk testing results for the samples collected from various interior locations from the 1st to 3rd floors. ESHA conducted the survey on Friday November, 17th 2006.

The bulk samples were collected with standard sampling protocols, properly packaged and shipped to EMSL Analytical Laboratory, Westmont, New Jersey for analysis by Polarized Light Microscopy (PLM) specific to asbestos content by volume.

The bulk sample analysis indicates that the following materials contain asbestos:

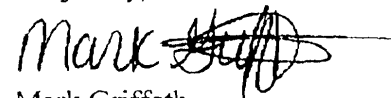

- 1st Floor Mudded Fittings/Boiler - 30 % Chrysotile Asbestos
- 1st Floor Pipe Covering Insulation/Boiler - 60 % Chrysotile Asbestos
- 3rd Floor Kitchen Linoleum Top Layer Left Apartment - 5 % Chrysotile Asbestos
- 3rd Floor Bathroom Linoleum Right Apartment - 10 % Chrysotile Asbestos
- 1st to 3rd Floor Stairwell Linoleum Less Than 1% Chrysotile Asbestos

Any suspect materials with greater than 1% asbestos by volume are State of Maine DEP regulated asbestos materials. Any suspect materials with Less than 1% asbestos by volume is an OSHA regulated material.

The materials will need to be removed by a State of Maine DEP licensed abatement contractor prior to any renovations or demolitions.

We appreciate the opportunity to service your asbestos testing needs, should you require further bulk or air quality sampling please feel free to contact us at any time.

Very truly,

Mark Griffeth
 Asbestos Inspector- AI # 0230

Due to magnification limitations inherent in PLM, asbestos fibers in dimensions below the resolution capability of PLM may not be detected. Samples reported as <1% or none detected may require additional testing by TEM to confirm asbestos quantities. The above test report relates only to the items tested and may not be reproduced in any form without the express written approval of EMSL Analytical, Inc. EMSL's liability is limited to the cost of analysis. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. The test results contained within this report meet the requirements of NELAC unless otherwise noted. Samples received in good condition unless otherwise noted.
