

There are 2 doors to the exit enclosure because I wanted 2 doors. It is my understanding that there is nothing in the IBC that would prevent me from having 2 exits from this unit. More specifically, I have a shoji screen that I was going to use to divide the room. One part as my personal office and the other part living area. I wanted to have 2 different access points for this use. See shoji in red. The intent of this unit is to be a single unit as noted in the plans. Please note, I made the bath on the mezzanine level larger.
